

## **PRESS RELEASE**

### **Rolko and MK Battery Join Forces in Logistics & Distribution in the USA**

**Bloomfield, IA / Anaheim, CA, January 31, 2024** – Rolko North America, Inc., a subsidiary of Rolko Kohlgruber GmbH, a leading manufacturer and supplier of components and accessories for the mobility market, and MK Battery, the world’s premiere supplier of batteries to the HME industry, have inked a comprehensive agreement for MK to provide warehousing, logistics, distribution, and route delivery services to support Rolko’s line of components for wheelchairs and rehabilitation equipment. Under this arrangement, MK Battery will stock Rolko products and make them available via their nationwide order processing and route delivery system. MK customers will be able to add accessories such as wheels, tires, seatbelts, armrests, etc. onto their battery orders.

According to Mark Chelgren, President of Rolko North America, “We are very excited about this association that now provides enhanced, more efficient and cost-effective customer access to our products.” MK Battery President, Wayne Merdinger, agrees. “Our route delivery fleet is already servicing HME providers throughout the country, and this addition of complementary, high-quality products will provide our customers with the same level of service on wheelchair parts and accessories that they have come to expect when purchasing our batteries.”

Rolko products are now available for purchase via MK Battery’s customer service order entry process, with select items available for local route delivery where available.
